

# DOUBLE STACK CONVECTION OVEN

Includes: 10 Shelves

## INSTRUCTIONS

---

### STEP 1

Connect hose to propane tank. Tighten counterclockwise and open the valve.

### STEP 2

Make sure the oven is plugged into a grounded outlet. The top and bottom ovens have their own power cords. Plug in both. Two outlets are needed.

### STEP 3

Press the **ON** button to turn on.

### STEP 4

Turn the **TEMP** knob until desired temperature is shown.

### STEP 5

The small red light on the top right corner of the **TEMP** button will turn off when the oven has reached desired temperature.

### STEP 6

To use the timer, turn the **TIMER** knob to the desired length and press the **TIMER** button. Press and hold to turn off the timer.

### AFTER HOURS:

Contact your local branch.

---

### PROPANE USE

A 40lb propane tank will last for approximately 25 hours.
